### **REASONS FOR ALLOWANCE**

1. The following is an examiner's statement of reasons for allowance:

Applicant's amendments to the claims and arguments found on pages 4-6 of the response filed on 7/19/04 overcome the prior art rejections.

The prior art does not teach or suggest a method of making a roll end including making the roll end by a powder metallurgy process in a mold such that a duct system (10) has portions within the end flange of the roll end, where the duct system end flange portions are formed in connection with the stage of making the roll end by the powder metallurgy process, wherein the pipe system is coated outside with a heat insulating coating before the pipe system is disposed in the mold, in combination with all of the other limitations of claim 8.

Furthermore, the prior art does not teach or suggest a method of making a roll end including a powder material that conducts heat more poorly than steel, used at a selected depth in a region intended to be under a bearing, in combination with all of the other limitations of claim 13.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
